

Determining Rock Age using Index Fossils

You find a rock, which contains 4 fossils. Using what you know about index fossils, A) Determine the age of the rock, B) Graph your data, & C) Determine which fossil is the best index fossil.

Fossil	Time span on Earth
A	230-294 m.y.a.
B	218-253 m.y.a.
C	245-297 m.y.a.
D	225-248 m.y.a.
